

Outer Space Mural -- Robert Frost Elementary

2nd grade students created a mural to compliment the solar system unit of their curriculum, with the theme: "Robert Frost is Out of This World." All students in the second grade did drawings of planets, stars, asteroids, spaceships, astronauts and aliens. 5th grade students designed the illustrated lettering for the title. Students' artwork was copied onto overhead acetates and projected onto the wall, and outlined in permanent marker. Then students came down in small groups over several weeks to paint. Parent volunteers helped with painting in the background and touching up some of the tricky outline areas.
